Fort Wayne, IN

SUMMARY

Software engineer specializing in Swift, SwiftUI, and native mobile development. Proven track record rebuilding mobile codebases into performant, maintainable applications across Apple and Android platforms.

SKILLS

Languages: Swift, Kotlin, Objective-C, C, SQL, Dart, 4D

Frameworks: SwiftUI, UIKit, AVFoundation, CoreML, SwiftData, CloudKit, HealthKit, Jetpack Compose, Flutter, Kotlin Multiplatform

Tools: Xcode, Git, Codemagic, FFmpeg, Ultralytics YOLO, CreateML

Concepts: MVVM / MV Architecture, Swift Concurrency, CI/CD, unit testing, relational databases

EXPERIENCE

V1 SPORTS — SENIOR MOBILE SOFTWARE ENGINEER | FEBRUARY 2026 - PRESENT

— SOFTWARE ENGINEER | OCT 2024 – FEBRUARY 2026

— SOFTWARE ENGINEER (CONTRACTOR) LUCID SERVICES GROUP | JUN 2024 – OCT 2024

- Built a custom golf ball tracer from scratch, training a YOLO-based detection model on 28,000 images and converting it to CoreML for on-device inference
- Designed a multi-phase tracking algorithm with trajectory-based detection gating and cluster rejection to improve trace accuracy by using Apple's Vision framework
- Delivered a production video pipeline processing frames at 120 FPS with real-time shot trace rendering
- Developed cross-platform video composition using Kotlin Multiplatform, AVFoundation, and FFmpeg, improving playback and stitching on iOS and Android
- Built camera capture features in Swift and AVFoundation, packaged as a Flutter Native Plugin with Codemagic CI/CD
- Integrated a pressure mat device via custom C library, generating real-time heat maps and biomechanics feedback
- Authored system architecture documentation enabling rapid onboarding across experience levels
- Led cross-functional discussions and architectural refactors that accelerated feature deployment

MOLARGIK SOFTWARE LLC — FOUNDER & DEVELOPER | JUL 2024 – PRESENT

Published apps: Opalite · SetDeck · Mygra · Waffle · Stork

- Designed, built, and shipped five Swift-based apps spanning graphic design tooling, health analytics, utilities, and productivity
- Built advanced SwiftUI interfaces with custom animations, navigation stacks, and multi-window iPad support
- Architected persistent data layers using SwiftData and CloudKit for real-time cross-device sync
- Integrated Foundation Models, HealthKit, and WeatherKit for on-device intelligence and personalized insights
- Delivered deep platform integration: Widgets, Live Activities, watchOS complications, and Siri Intents
- Implemented offline-first architecture using Swift Concurrency and CloudKit transactions

SWEETWATER SOUND — SOFTWARE ENGINEER | APR 2022 – APR 2024

Mobile & Desktop Applications, 4D Relational Databases

- Rebuilt iOS and Android storefronts from scratch, replacing legacy codebase with native Swift/SwiftUI and Kotlin/Jetpack Compose implementations
- Drove significant improvements in discovery-to-sales conversion, with mobile ultimately surpassing web in sales volume
- Mentored senior engineers in macOS development with Swift and SwiftUI
- Led design and development of major features across mobile platforms
- Deployed applications to App Store and Google Play, improving release cadence and value delivery
- Presented project outcomes and roadmaps to department-wide audiences

EDUCATION

Purdue School of Engineering and Technology, IUPUI

B.S. Electrical Engineering, Minor in Mathematics | GPA: 3.72 | Graduation: May 2020
